TRANSPORT NETS

Description

Transport nets for load lifting, with four edge loops. All edge loops are equipped with chafers. Chafers are not firmly connected to the loops. Loops and edge of net are reinforced, meshes are knotted.

Advantages

Bigger quantities of goods can be transported safe and quickly onto the roof. No time-consuming fixation of single rolls necessary.

Technical Data

Subject	Unit	Transport Nets
Raw material	---	Polyethylene rope, braided
Rope Ø	mm	5
Colour	---	green
Mesh size	mm	50
Edge line and danline Ø	mm	16
Load capacity	t	up to 3
Dimension	m	5 x 5
